Scope  
Web Development

Vehicle assignment system is an all-in-one platform for managing bookings, assigning drivers, selecting guides and cars, tracking trips in real time, calculating costs, scheduling, chatting, and generating reports. Drivers can install the PWA to view their assignments, see their live location on the map, and receive updates.

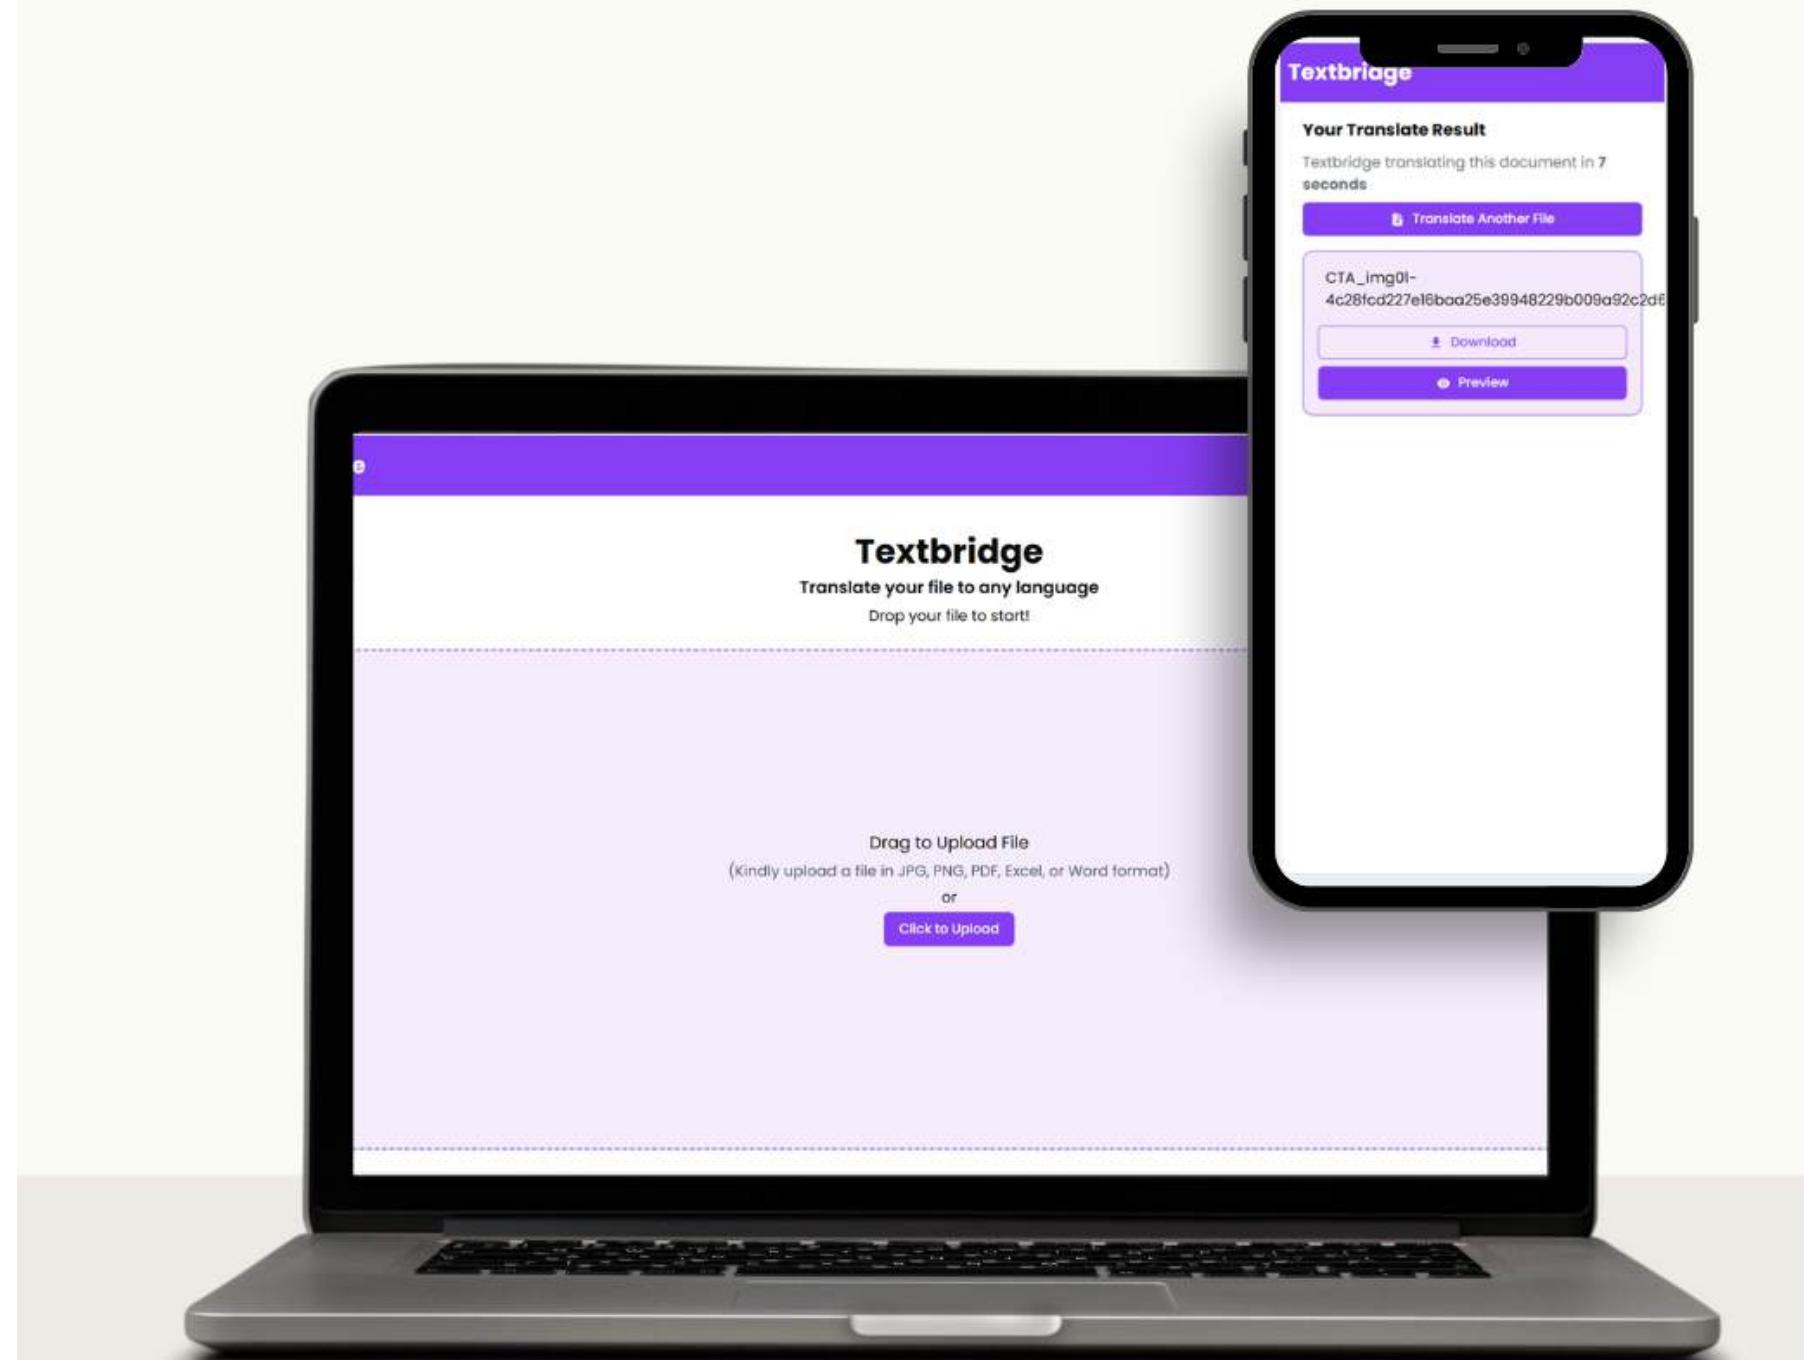

Year

2025

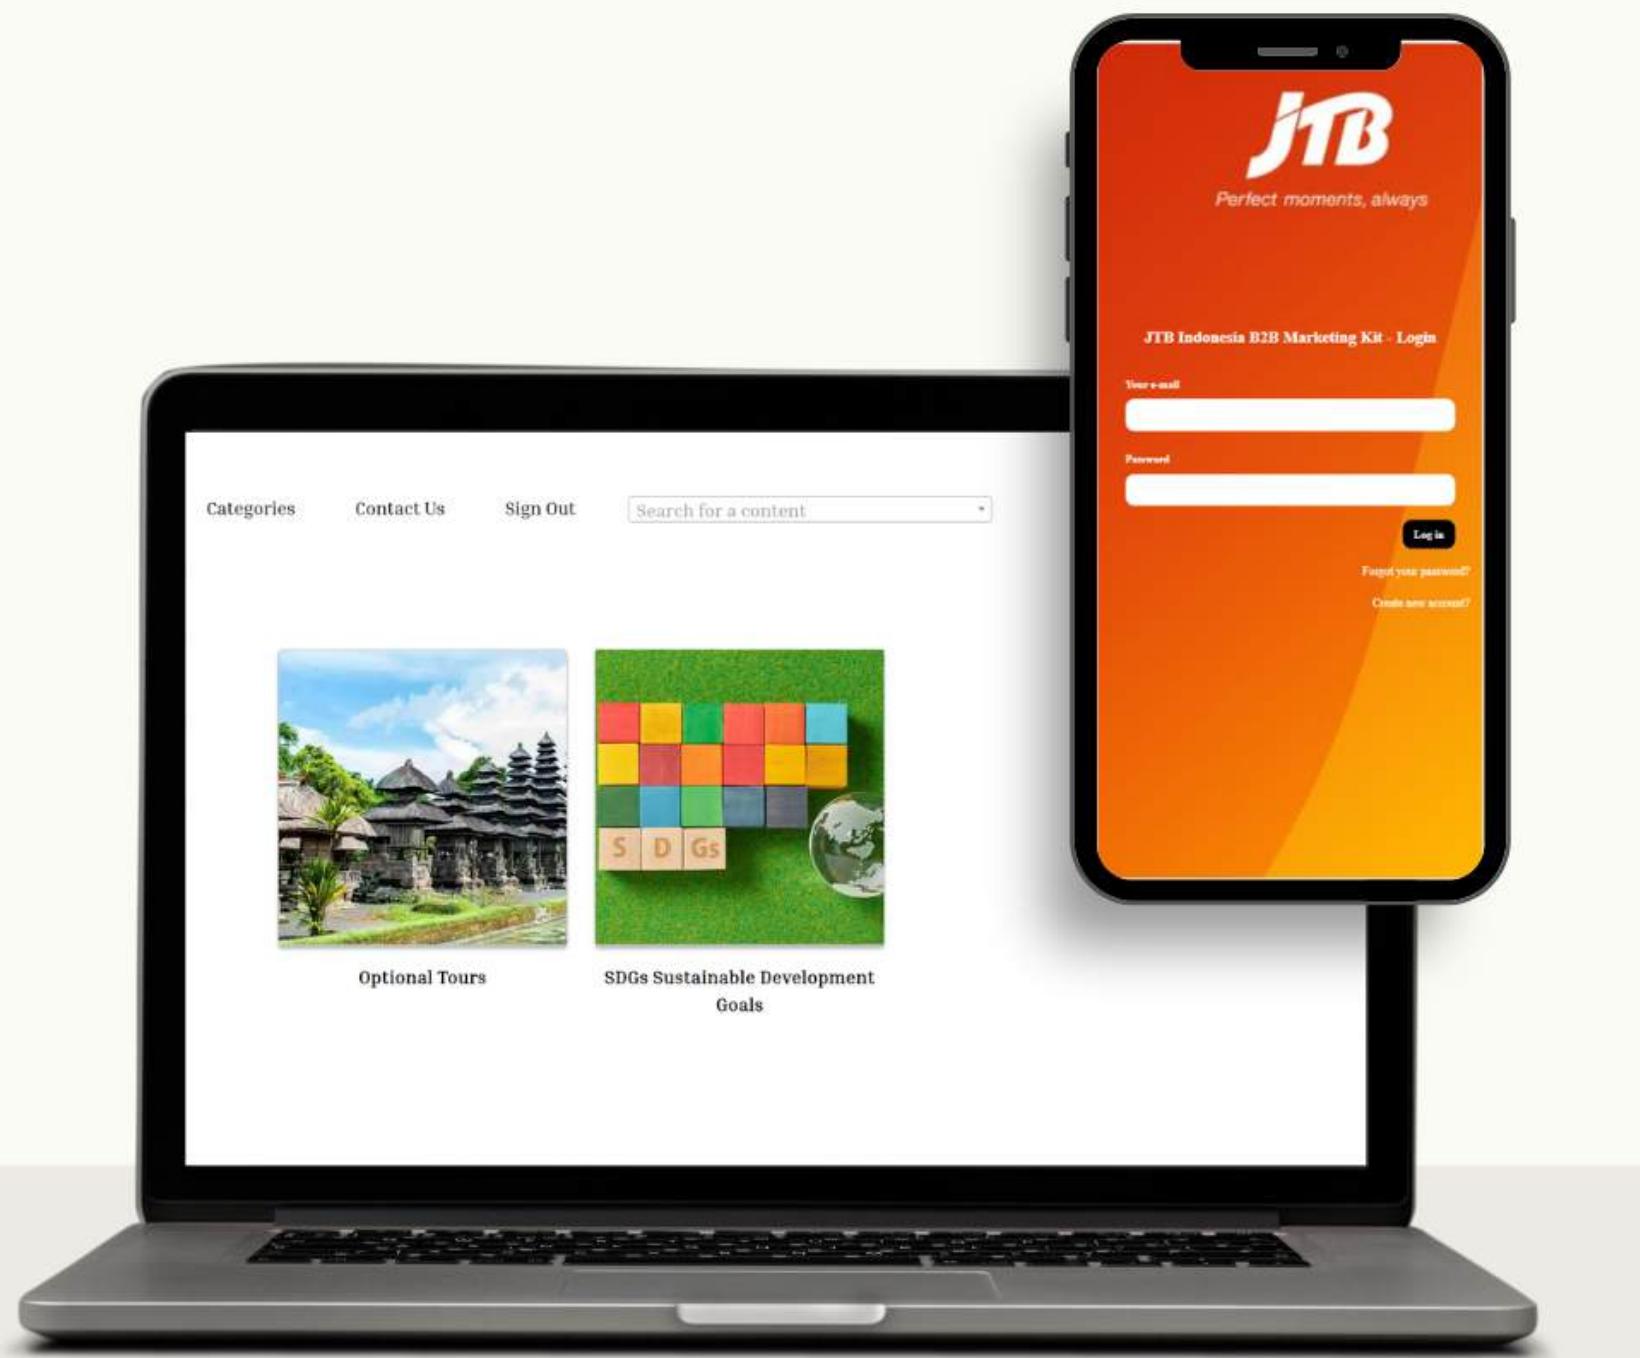

Scope

Web Development

TextBridge is to simplify and streamline the process of reading and translating original source language document into other languages by leveraging AI translation technologies (by Google). The application aims to help businesses overcome language barriers, improve productivity, and enhance document processing efficiency.
